- **Data Centres**
- **Metal & Oil & Gas**

We offer the widest product portfolio in PPE – HONEYWELL & DUPONT

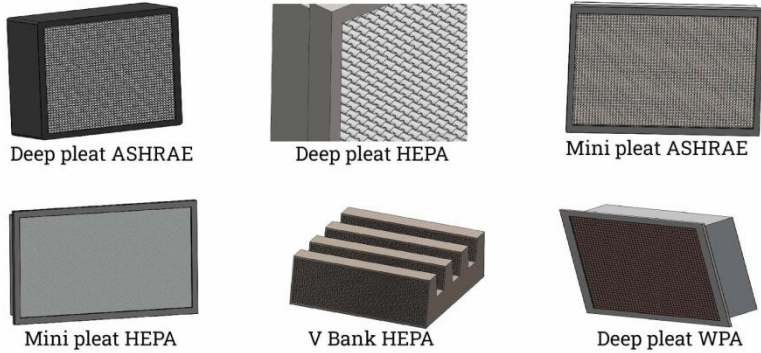

- Strong and recognized global and regional brands
- Complete offering unmatched in the industry
- Premium technology and designs that maximize comfort and fit, and improves productivity
- Strong industry and hazards expertise
- Focus on customer satisfaction
- Innovative and complete offers for professional self-service environments

Molecular Contamination Filters

Dust Collectors Filters

HVAC Intake Air Filters

IQSdirectory.com

- HVAC stands for Heating, Ventilation, and Air Conditioning, and it relates to mechanical equipment and systems that can regulate the temperature and the air quality of a building.

- Molecular filters typically use a range of activated carbon, impregnated media, chemical catalysts and oxidizers to remove harmful gases including volatile organic compounds, odors, and nitrous oxides from an air flow..

- Dust filters are placed over ventilation openings to mitigate dust accumulation within the transformer's enclosure. Filters are typically made to be removable and washable. Care must be taken for regular maintenance since accumulating dust will limit airflow and reduce air cooling.

Cleaning Chemicals

- Cleaning products are crucial in daily life, removing soils, germs, and other contaminants to help prevent the spread of infectious diseases and control allergens like dust and mold.
- Cleaning products play an essential role in our daily lives. By safely and effectively removing soils, germs and other contaminants, they help us to stay healthy, care for our homes and possessions, and make our surroundings more pleasant.

Sustainable Solutions

100% Home Compostable Plastic Free Products

Eco-friendly products made from natural, biodegradable materials that fully decompose in home composting systems, reducing environmental impact and promoting sustainability.

Lubrication

Lubrication serves to lubricate each part of the bearing, reducing friction and wear. It also helps carry away heat generated inside the bearing due to friction and other causes. Proper lubrication covers the rolling contact surfaces with an appropriate oil film, prolonging bearing fatigue life and preventing corrosion and contamination by dirt.

Lubrication Greases

Lubrication Pastes

Lubrication Oils

MAJOR PROJECTS

HVAC PROJECTS:

- AMAZON
- CONTROL S
- NOVARTIS
- DR.REDDYS
- GLAND PHARMA

PPE Partner:
